ITE-LAB(IT5211): MINI PROJECT – TECHOPHARM

I.INTRODUCTION

My idea of this mini project is to create a website, where medicines can be bought online by the customers.

The aim of this project to ensure the comfort and safety of the customers by providing 3-step quality assurance and having good record of essential details like manufacture date, expiry date, etc.

Separate pages are created for admin and users where each page contains different functionalities.

II.FUNCTIONALITIES OF THE WEBSITE

➤Admin section:

1. To view the orders placed by customers.
2. To view the delivered history to different customers.
3. To keep record of the available medicines.
4. To change the availability of medicines.
5. To view the details of the users.
6. To alter/modify the items.
7. To logout to general page.

➤User section:

1. To alter profile of the user.
2. To view the available medicines for purchase.
3. To view cart.
4. To view status of all our orders.
5. To print the receipt cum order list.
6. To logout to general page.

➤General page:

1. Shows answers to common questions about the site.
2. To redirect to admin login.
3. To redirect to user login.
4. To use forgot password.
5. To sign up for new customers.

III.PAGES

- ✓ General page
